Leighton:

As you know, we have been purchasing foamed vinyl grips from Eezer Products since September of 1985. During that time, we have obtained from you in excess of 1.25 million grips that have been used on a variety of items that we produce.

ASP is a major manufacturer of law enforcement intermediate force equipment. Our clients include the vast majority of the federal, state and municipal law enforcement agencies in this country as well as high profile law enforcement and military organizations throughout the world. This includes the Royal Canadian Mounted Police, the London Metropolitan Police, the Finnish Federal Police, the National Police of Sweden and all law enforcement agencies in Australia. These organizations specify our products on a sole source basis.

Our products must meet some of the most severe performance requirements in the world. After extensive testing, we found that only your grips have the extreme toughness, durability, resistance to abrasion and dimensional stability that are necessary for long years of extremely harsh use.

The individuals who purchase our products must literally stake their lives on their performance. I know of no grip manufactured by any company anywhere in the world that meets the standards set by your grips.

Sincerely,

ARMAMENT SYSTEMS AND PROCEDURES, INC

Kevin Parsons, PhD
Chairman and CEO
